

Tran Thi Thuy Ngan

Full-Stack Developer

tranthuyngan2516@gmail.com | 0948 177 282 | github.com/tranthuyngan2516 | Can Tho, Vietnam

Professional Summary

Developing a career as a Full-Stack Developer with Java Spring Boot and NestJS, focusing on building RESTful APIs and business logic. Solid foundation in database design (MySQL, SQL Server) and experience with enterprise systems through 3 projects at Mobifone in a Scrum environment. Seeking to join an enterprise environment to strengthen practical skills, optimize and operate production systems, and contribute across the full lifecycle from design to deployment.

Work Experience

Digital Solution Business Center - Mobifone

Jun 2026 – Present

Full-Stack Developer (Intern)

Can Tho, Vietnam

1. Contributed to 3 enterprise web projects from day one, owning features end-to-end: requirements analysis, design, module/API development, testing, and handoff under Scrum (daily standups, weekly progress reviews).
2. Built approximately 10 modules from scratch (Controller, Service, Repository, Entity layers) using NestJS, TypeScript, MySQL, and TypeORM; committed 150+ times across shared GitLab repositories.
3. Inherited and stabilized the WEBGIS & Industrial Zone Management system (KCN/KCX Can Tho), resolving 10+ production bugs and developing 2 new modules.
4. Developed 2 modules (Innovation Category and Innovation Type management) for the Innovation Management System of a ward People's Committee, with complete CRUD APIs with validation; self-tested before QA handoff.
5. Acted as project tester: authored 15–50 test cases per project, validating features directly on production-like environments across 10–15 screens per project.
6. Projects: WEBGIS & Industrial Zone Management (Can Tho); Innovation Management System (Vi Tan Ward People's Committee); WEBGIS & Binh Thuy District Management.

Freelance Developer

Nov 2025 – Mar 2026

Backend Developer (Part-time)

1. Delivered 2 production backend systems for small and medium business clients (including Dan-HoaBridal, a family fashion business), converting complex ERD diagrams into normalized SQL Server schemas with indexing strategies that measurably improved query response times.
2. Built maintainable CRUD RESTful APIs and business logic with Java Spring Boot (MVC + Spring Data JPA); managed remote collaboration, Git branching, and merge conflict resolution over 10 months of development.

Personal Projects

TECHCORE: Revenue & Expenditure Management

Full-Stack

Tech: Java Spring Boot, Nuxt.js, JWT, SQL Server, Docker, VPS

1. Secured financial APIs with JWT middleware and fine-grained RBAC across multiple roles.
2. Implemented transaction-safe budget-allocation logic, preventing data anomalies under concurrent operations.
3. Deployed the complete system on a Linux VPS with Docker for the WEB AI HACKATHON 2026 competition.

TECHCORE: Recruitment & HR Management

Backend

Tech: Java Spring Boot, SQL Server, Bean Validation

1. Designed a normalized SQL Server schema for high-volume candidate profiles; implemented the full lifecycle from job postings to applications to automated status updates with validated RESTful APIs.

DANHOABRIDAL: Fashion Management Platform

Backend

Tech: Spring Boot, Nuxt.js SSR, Firebase, SQL Server

1. Modeled a multi-attribute product system (size, color, and stock variations) with inventory tracking; integrated Firebase Storage for media and Nuxt.js SSR to improve category page load speed.

Education

FPT Polytechnic College Can Tho

Aug 2024 – Present

Software Development

Can Tho, Vietnam

Skills

1. Backend: Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, NestJS, Node.js, TypeScript, Express, RESTful API.
2. Frontend: ReactJS (Hooks, React Router, State Management), Ant Design, NuxtJS, JavaScript (ES6+), Bootstrap, HTML, CSS.
3. Databases: MySQL, SQL Server, TypeORM, database design, indexing, query optimization.
4. Security & Auth: JWT, Session & Token, RBAC, OAuth2, OpenID Connect.
5. Tools & Practices: Git, GitLab, Scrum, Postman, Docker, Firebase, Linux VPS, WEBGIS, XAMPP.

Languages

English (TOEIC 630, strong technical reading).
